October 15, 1917

Mr. Ahern:

Referring to your bulletin No.2502 (D), Oct. 10th, file 520-311, notifying all concerned regarding additional stops to be made, timetable 105.

Our passenger department has stated that it will not be necessary to stop trains 77 and 78 daily on flag at Waldorf, but will be satisfactory for

No. 77 to stop on flag Wednesdays, Fridays and Saturdays
No. 78 " " " Fridays and Sundays

same as last year. Please arrange accordingly.

(Signed) W. R. SCOTT.
R.W.H.

CLEARANCES.

Trains must obtain clearance card before leaving San Jose.

Trains must obtain clearance card before leaving Santa Cruz when an operator is on duty.

Trains to and from Pacific Grove branch must obtain clearance card before leaving Del Monte Junction when an operator is on duty.

Eastward trains via Los Altos must obtain clearance card at Mayfield when operator is on duty.

Within automatic block limits, last portion of Rule 86 will not apply.

Rule 83-A will not apply at initial stations which are not telegraph stations nor at telegraph stations except when operator is on duty.

REGISTERING.

At registering stations on single track, or at the end of double track when passing from single to double track, where trains are permitted to register as per Rule 83-B, conductors and telegraphers, or telephone operators, must comply with Rule 96, the same as at non-registering stations.

EXCEPTIONS.

San Bruno: Only No. 35 and trains originating and terminating will register.

Redwood City: Only trains via Dumbarton line and trains originating and terminating will register.

Mayfield: Only trains via Los Altos and trains originating and terminating will register.

College Park: Only trains via West San Jose and Western Division trains originating or terminating at San Jose or College Park will register.

All eastward trains on Campbell line stopping to register at College Park switch house must not stop until rear of train is east of three-arm signal at this point.

All eastward trains into Market Street station, when stopping to register at College Park switch house, must not stop with more than one car west of switch house.

All westward Coast Division trains stopping at College Park station must not stop until rear of train is west of dwarf signal at this point.

Western Division trains holding orders to display signals to College Park will continue to do so on Coast Division, College Park to San Jose, and will display signals from San Jose when holding orders to display signals on Western Division from College Park.

Lick and Campbell: Only trains moving over New Almaden Branches will register.

Gilroy: Nos. 101, 77 and 75 will register by ticket as per Rule 83-B.

Carnadero: Only Tres Pinos Branch trains will register.

Del Monte Junction: Only trains running under schedules originating and terminating and trains via Gigling will register.

Salinas: Only trains originating and terminating will register.

San Ardo: Only trains originating and terminating will register.

RAILROAD CROSSINGS NOT INTERLOCKED.

Watsonville.........................Pajaro Valley Consolidated Ry.
Nashua...............................Pajaro Valley Consolidated Ry.

One long blast of the whistle should be sounded at the proper distance when approaching same; two short blasts to be sounded after the train has stopped and before passing over the crossing.

Monta Vista **Congress Junction**

One long blast of whistle should be sounded at the proper distance when approaching same and speed reduced to twenty (20) miles per hour until train has passed over crossing.

TRAIN AND AIR INSPECTION.

Air brakes on all trains must be tested at Santa Margarita, Davenport, Glenwood, Santa Cruz, Boulder Creek, Tres Pinos and New Almaden and when air line has been cut or cars are picked up or set out at any point, in the manner prescribed by air brake Rule No. 17. Special attention should also be given to Rule No. 14.

When making running test leaving San Francisco, San Jose, Watsonville Jct., Santa Margarita, and San Luis Obispo it must not be made until rear of train is over Fourth Street, San Francisco, by the water columns on both tracks at San Jose, by the water columns at Watsonville Jct., by the water tank at Santa Margarita, and by the place that engine stands on train at San Luis Obispo. At other places where running tests are required to be made rear of train must pass place where track is slippery, due to oil and water on rails from standing engines; this on account of liability of sliding and flattening wheels at these points.

Running test to be made by eastward and westward trains after passing summit in Tunnel No. 6 between Cuesta and Thyle.

The tonnage of any train between summit in Tunnel 6 (located between Cuesta and Thyle) and San Luis Obispo or Santa Margarita and on the Los Gatos line between Glenwood and Los Gatos and Glenwood and Eblis, must not exceed 115 M's per operative brake.

USE OF RETAINERS.

Conductors will be responsible for proper handling of retainers by brakemen.

On passenger trains descending grades between San Luis Obispo and Santa Margarita, all available retainers will be turned up, including the retainer on tenders of locomotives, as soon as the train passes the summit; in order that the retainers may be gotten into operation before any considerable distance is covered, trains will not exceed a speed of twenty miles per hour on westward trains from summit to west switch at Cuesta and on eastward trains from summit to west portal of Tunnel No. 8.

On freight trains, descending grades between San Luis Obispo and Santa Margarita, all retainers will be turned up, including retainer on tender of locomotives.

Retainers will be used on westward trains to the automatic distant signal east of Santa Margarita and on eastward trains to the west switch at Hathaway. Should wheels give evidence of excessive heating, retainer may be turned down for a time and then turned up again.

Retainers will be used at other points and under other conditions where in judgment of the engine and train crew it is deemed necessary.

Where retainers are used the rate of speed of freight trains on any grade of over one per cent (over 1%) will not exceed 25 miles per hour, and on grades of this character, MORE THAN FIVE MILES LONG, FOR THE FIRST FIVE MILES THE TIME CONSUMED IN TRAVELING ANY ONE MILE SHALL NOT BE LESS THAN THREE MINUTES.

This will not be authority to exceed specified speed restrictions.

USE OF 19 FORM TRAIN ORDER FOR RESTRICTING TRAINS WITHIN AUTOMATIC BLOCK SIGNAL LIMITS.

Within automatic block signal limits, between San Francisco and Santa Barbara, and between Vasona Junction and Santa Cruz, the note under Rule No. 211 is modified as follows:

Form "19" train order may be issued to restrict the superiority of a train, except that Form "31" must be used:

(1) When orders are delivered at a non-telegraph or closed telegraph station. (See Rule No. 217.)
(2) When necessary to restrict a train which has been cleared or the engine of which has passed train order signal. (See Rule No. 219.)
(3) When issuing an order Form "G," Example 3.
(4) When giving any train right over all trains.
(5) When reducing a time order where necessary that dispatcher have signature of superior trains before completing order to an inferior train.

Operators on all districts will fill out clearance, designating thereon numbers of orders, repeat to dispatcher train and order numbers as they appear on clearance and obtain O. K. with time and Superintendent's initials, writing same before delivery in blank space following "Signal is out for." Operator will retain carbon copy of clearance.

Dispatcher must write train and order numbers in his train order book as transmitted by operator from clearance, and must designate time clearance was made O. K., not transmitting O. K. unless operator repeats numbers of all orders to be delivered to the train to which clearance is addressed.

When a "19" order restricting superiority is issued at a station where superiority is restricted, train must be stopped by operator before delivery of order.

Attention of conductors and engineers is called to the importance of approaching at a moderate rate of speed, not to exceed 20 miles per hour, telegraph offices where orders are to be received. Also to the necessity of carefully checking clearance to ascertain positively that clearance is properly addressed and that orders received are those called for by clearance.

AUTOMATIC BLOCK SYSTEM.

Signal westward trains San Luis Obispo yard and distant signal westward trains Logan yard on left side of track.

Referring to Rule No. 504, Book of Rules: On **SINGLE TRACK** trains will wait five minutes before following flagman.

San Jose. If signal 464 is at stop, proceed immediately; in storm or fog, flag.

When train is stopped by automatic block signals 1001 or 1002, Watsonville Junction Yard, 1184 or 1185, Salinas Yard, 2524 or 2525, San Luis Obispo Yard, it may proceed under control not exceeding six (6) miles per hour to next home signal if track is known to be clear or in established yards on signal of yardman.

Vasona Junction signal 518 will not assume proceed position until after junction switch is lined for Campbell-Los Gatos line.

West Santa Barbara, signal 3686 will not assume the proceed position until after switch is lined for eastward track.

Westward trains will stop east of signal 833 if to hold main track with a meet at Carnadero.

Trains delayed by block signals must report to Superintendent by wire. Conductor must use every reasonable effort to ascertain cause.

OVERLAPS.

Affecting eastward trains—Nova and Hathaway. Westward trains—Tennant and Miller. Eastward and westward trains—Logan. Trains in direction indicated holding main track against opposing trains must not pass post marking overlap of adjoining block, and switch must not be opened to head opposing train into siding until it is known that expected train has passed signal at opposite end of block.

STAFF LIMITS.

Wright and Glenwood. Staff is used as additional precaution and does not suspend requirements of rules, time-table nor train orders. Westward trains obtain staff at Glenwood, eastward trains at Wright when operator is on duty, and must not pass station train order signal until staff is in their possession.

In case of wire trouble, trains may move within these limits on authority of staff only; Rule 457 will not apply. When office at Wright or Glenwood is closed trains moving without staff must register.

INTERLOCKING SIGNAL TOWERS.

Trains must clear detector circuit at all times.

Particular attention to Rules 663, 671 and 903.

Movements through interlocking plants on a hand signal from towerman, train must be preceded by a flagman.

Engineers will sound one short and two long (o ——— ———) blasts of the whistle for Coast Division main track.

Fourth Street Tower.

The limits of 4th Street interlocking plant, San Francisco, extend from point where main tracks intersect King Street to Terminal Station and include main tracks and ladders and certain switches adjacent.

All moves within these limits will be governed by dwarf signals (home signals are not semi-automatic), each signal over route train is using good only to next signal. Movement must be made under control and position of switches observed as such signals govern movements for various routes.

Trains, or yard engines, coming from train sheds at Passenger station may proceed to first signal eastward from train shed.

When working in interlocking limits all trains and yard engines must be governed by fixed signals and must move far enough to get fixed signal for move in reverse direction.

If one blast of large air whistle at interlocking plant is sounded all trains and yard engines within limits of interlocking plant must stop.

When their train is ready to depart Conductors will push button on same side of post in train shed as the starting light for their train is on.

As detector circuits control switches, cars must not be left standing on them.

The tracks and switches within this plant are numbered and in arranging between yard men and tower men for movements track, or switch numbers or both should be used so clear understanding will be had. All orders over phone must be carefully given and repeated back.

Ninth and Division Tower.

Eastward trains governed by dwarf signal 300 feet west of tower.

Westward trains governed by one-arm signal 900 feet east of tower; this signal governs to two-arm signal 40 feet east of tower.

Two-arm signal 40 feet east of tower; upper arm for movement westward on main track; lower arm other routes.

Eastward movement on industry track governed by one-arm signal 420 feet west of tower.

Other movements governed by dwarf signals within interlocked limits.

Whistle signals to be used.

One short and one long (o ———) blast of whistle for Chemical Works (track 66); two short, one long and two short (o o ——— o o) blasts of whistle for upper stone yard; one short, one long and two short (o ——— o o) blasts of whistle for lower stone yard; two long and one short (——— ——— o) blasts of whistle for Dunham, Carrigan and Hayden Spur; one long and one short (——— o) blast of whistle for old eastward track.

College Park Tower.

Eastward trains governed by signals on bridge 1200 feet west of tower. The signal posts on bridge are placed over track trains approach.

SPECIAL INSTRUCTIONS—Continued.

Upper arm good eastward on main track to two-arm post 250 feet east of tower; lower or short arm good eastward for other routes.

Two-arm post 250 feet east of tower, upper arm good for eastward main track to San Jose; lower arm good to Campbell line.

Westward trains from San Jose governed by three-arm signal 700 feet east of tower; upper arm for main track to San Francisco; middle arm for Newark track, and lowest arm good for other routes.

Westward trains Campbell track governed by three-arm signal 500 feet east of tower; upper arm for main track to San Francisco; middle arm for Newark track, and lowest arm other routes.

Trains from San Jose freight yard governed by dwarf signal 10 feet east of cross-over switch.

Other movements governed by dwarf signals.

Engineers will sound two short, one long and two short (o o ——— o o) blasts of whistle for Newark or Campbell track; one long and one short (——— o) blasts of whistle for San Jose freight yard; two long and one short (——— ——— o) blasts of whistle for Santa Cruz drill track; one short and one long (o ———) blasts of whistle for Santa Clara.

San Jose Tower, Coast Division.

Towerman will not change signals to proceed for westward Coast Division trains while westward track in station is occupied by train.

Two-arm signal 150 feet west of tower, upper arm governs movement of eastward trains, main track; lower arm governs movement to spur at Third Street.

Single arm signal at Fourth Street governs movement westward trains to two-arm signal at Third Street.

Upper arm at Third Street signal governs movement westward trains, westward main track; lower arm governs movement westward trains through cross-over to dwarf signal or to eastward main track.

Dwarf signals govern movement of eastward trains from track 3 or from freight yard to main track.

Westward Coast Division trains desiring to enter freight yard will sound one long and one short (——— o) blasts of the whistle.

San Jose Tower, Western Division.

Two-arm signal at Third Street, upper arm governs movement of eastward trains to dwarf signal; lower arm governs movement to spur between First and Second streets.

Dwarf signal governs movement of westward trains from freight yard or track 3 to Niles line.

Eastward Western Division trains desiring to enter freight yard will sound one long and one short (——— o) blasts of the whistle.

Engineers will sound two short, one long and two short (o o ——— o o) blasts of whistle when to move from San Jose Yard to Western Division Niles line; one short and one long (o ———) blasts of whistle for Borchers Spur.

Other movements governed by dwarf signals.

Hadley Tower.

Note general and special rules.

SPEED TABLE.

Speed per Hour	1 Mile in Min. Sec.	Speed per Hour	1 Mile in Min. Sec.	Speed per Hour	1 Mile in Min. Sec.	Speed per Hour	1 Mile in Min. Sec.
6	10	21	2.51	31	1.56	41	1.27

E—73 20/24 92	1445 to 1458	73	33840

The above table is for the information of Enginemen, and must not be considered to in any way authorize exceeding speed restrictions.

SPEED RESTRICTIONS.

Maximum speed of any train at any point must not exceed 50 miles per hour.

Trains must not exceed a speed of 15 miles per hour between Third St. station, San Francisco, and west portal of Tunnel No. 1; and between Third St. station, San Francisco, and Valencia St. Trains must not exceed a speed of 12 miles per hour through San Jose and Los Gatos, 20 miles per hour through Gilroy, Santa Cruz and Watsonville, 8 miles per hour through Salinas, and 6 miles per hour through Hollister; 30 miles per hour between Dumbarton Wye switch and the first street crossing west of freight house at Redwood City. Time required between slow boards at Redwood City, 2 minutes.

Trains must reduce speed as follows:		Speed per Hour		Distance
		Pass.	Frt.	
San Francisco	Third St. Station to E. Portal Tunnel No. 1.	15	15	.....
Redwood City	828′ E. of M. P. 25 to 884′ E. of M. P. 26	30	30	5336′
Carnadero	900′ W. of M. P. 83 to 2600′ E. of M.P. 83.	30	30	3500′
Sargent-Betabel	1800′ W. of M. P. 87 to 1360′ E. of M. P. 89	40	35	3160′

Golf Links	3000′ E. of M. P. 76 to M. P. 77	25	20	1380′

Eastward freight trains not to exceed speed of 15 miles per hour through Tunnel No. 4 Bay Shore and look for signal to stop from flagman who might be protecting eastward track, stationed inside east end of tunnel.

Running time passenger trains Vasona Junction to Santa Cruz, exclusive of stops, 1 hour 12 minutes.

No train shall exceed a speed of 6 miles per hour on curves New Almaden line, nor speed of 10 miles per hour through cross-overs and entering sidings.

Eastward freight trains reduce to 10 miles per hour from a point one-half mile west of Hathaway to Hathaway to give trainmen an opportunity to turn down retainers.

No freight train must make a continuous run of over forty (40) miles without making a stop of not less than 5 minutes to make a careful examination of all cars.

Eastward freight trains stop at Chorro 5 minutes or more for wheels to cool and trainmen to examine wheels and running gear. Such trains delayed at Serrano 5 minutes or more make examination of wheels and running gear at that point instead of Chorro and omit stop at Chorro.

Westward trains reduce to 15 miles per hour approaching switches at east end of San Luis Obispo yard and not exceed this speed through yard.

Except as shown in "Speed Restrictions" the following limits of speed will govern:

	Passenger	Freight	Motor
West Portal Tunnel 1, San Francisco-Santa Margarita (via Bay Shore)	50	35	
Santa Margarita-San Luis Obispo	30	18	
San Luis Obispo-Santa Barbara	50	35	
Valencia St.-San Bruno (via Tanforan)	30	25	30
Lick-New Almaden-Campbell	15	15	
Carnadero-Hollister	40	30	
Hollister-Tres Pinos	35	25	
Watsonville Jct.-Santa Cruz	40	20	
Del Monte Jct.-Monterey	40	20	
Monterey-Pacific Grove	30	20	
Pacific Grove-Asilomar	15	15	
Lompoc Junction-Lompoc	30	20	
San Jose-Vasona Junction	50	30	
Vasona Junction-Olympia	25	20	
Olympia-Santa Cruz	30	20	
Davenport-Santa Cruz	50	30	
Boulder Creek-Felton	20	12	
Loma Prieta Branch	8	8	
Mayfield-Vasona Junction	50	30	

Maximum speed of certain classes of locomotives running light must not exceed: **Engines of consolidated type..........40 miles per hour.**

Mogul type—compound engines.......... 45 " "

Switch engines, 6 wheel connected.......... 20 " "

Running Backward.

Consolidated type .... 20 miles per hour.

Mogul type .... 25 " "

All types passenger power.......................... 25 " "

This except where maximum speed is 25 miles per hour, engines backing up in such territory will not exceed 15 miles per hour.

Employes must not ride on top of cars at above places. Employes in suburban and city limits must guard against coming in contact with overhead trolleys and other wires or their connections.

Stock Chute at Orella is not standard clearance, being old-style chute, clearance 6′ from center of track.

JUNCTION SWITCHES.

Switches at Vasona Junction and Felton must be left set, making track from Mayfield to Santa Cruz the continuous main track.

S. P. Co. trains and San Jose, Los Gatos & Interurban Ry. Co. cars will use S. P. Co. tracks from the junction between Campbell and L. G. & S. J. road to L. G. & S. J. road jointly. Switches at junction points must be lined up for Interurban Ry. Co. line. S. P. Co. train No. 202 has right over San Jose, Los Gatos & Interurban Ry. Co. cars on joint track, but must come to a stop before going on joint track and not exceed a speed of ten miles per hour over joint track All other S. P. Co. trains must first come to a stop before going on joint track and send flagman in advance immediately, wait five minutes after the flagman has started, and then proceed under control at a speed not exceeding six miles per hour until the train has passed off joint track, taking particular care not to close down on the flagman ahead until he has reached the end of joint track. All such S. P. Co. trains must be protected to the rear as per Rule 99.

WEIGHTS TO BE USED IN FIGURING TONNAGE OF PASSENGER TRAINS

Kind of Car	Average Wts.—Pounds		
	Wood	Steel	Steel Underframe
Baggage	79,000	90,000

MISCELLANEOUS.

YARDS.

Yards are established at the following stations:

San Francisco   San Jose   Gilroy   Watsonville Jct.   Santa Cruz
Salinas   San Ardo   San Luis Obispo   Lompoc Junction

Rules 93 and 93-D are revised as follows:

"Within yard limits the main track may be used, protecting against first-class trains.

ALL TRAINS MUST APPROACH YARD LIMITS AND PASS THROUGH YARDS UNDER CONTROL."

Flagging Exceptions:

San Jose: Westward first-class trains, having passed beyond the easterly limits of San Jose interlocker, and eastward first-class trains, standing at San Jose Passenger Station, need not protect. Trains must approach and move within these limits expecting to find track occupied by other trains. This does not affect observance of special instructions relative to Signal 464.

Sidings on Double Track at:

Visitacion, South San Francisco, Millbrae, San Mateo, San Carlos, Redwood City, Atherton, Mayfield, Mountain View and Lawrence. Cross-overs at San Francisco, 100 feet west of West Portal Tunnel No. 3, Bay Shore, Visitacion, South San Francisco, Tanforan "Y", San Bruno, Aqua, Millbrae, Easton, Burlingame, San Mateo, Belmont, Redwood City, 100 feet east of East Switch leading to Dumbarton Wye, Menlo Park, Palo Alto, Mayfield, Mountain View, Sunnyvale, Lawrence, Santa Clara, College Park, San Jose.

Train Dispatching Circuit telephones at all telegraph offices and sidings between Watsonville Junction and Santa Barbara, excepting Graves. Train Dispatching Circuit telephones also between Del Monte Junction and Pacific Grove. Dispatching telephone can be used from outside of telegraph office at Gonzales, Bradley, San Miguel and Edna.

Trains via Bay Shore must approach Tanforan Y and San Bruno under control, looking out for trains via Ocean View, crossing over or going onto eastward track.

Trains via Ocean View must be protected while crossing over or going onto eastward track at San Bruno and Tanforan Y.

Where helper engines on passenger trains are picked up at West San Jose or Santa Cruz, and are to be cut out at Glenwood in either direction, the helper shall be cut in ahead, but in event of the helper going through from Santa Cruz to West San Jose, or vice versa, the road engine shall be cut in ahead.

Trains going in on Loma Prieta Branch should sound one long blast of whistle before entering yard Loma Prieta Lumber Company to give warning to Lumber Company's men of arrival.

When using cross-overs, trainmen must comply with Rule 99, in both directions. After switches are thrown wait five (5) minutes before moving through cross-over, unless automatic block signal in each direction can be seen to be in stop position, not less than one-half mile distant.

Trains entering sidings will do so under control. Responsibility for collision is placed with entering train.

When one torpedo is exploded, train will stop (see Rule 15). If no person is at hand to explain the placing of torpedo, train may proceed to the next station or block signal as hereinafter provided:

(A) If view is obscured (by curves, fog, storm, etc.), flagman must be sent ahead and train may follow, under control, in the manner prescribed by Rule 504.

(B) If track is seen to be clear or (within automatic block limits) if signals indicate "PROCEED," train may proceed, but will run under control for a distance of one-half mile before resuming full speed.

On double track lines, when a train finds a fusee burning red, train should be brought to a stop and may then proceed CAUTIOUSLY, not exceeding six (6) **miles** per hour, to the obstruction or until clear signal is reached, or until track **is known to be clear.**

When a train encounters a red light or a red flag on single track unattended, they will protect ahead and to the rear and flag ahead one-half mile, stop signal to be answered by two short blasts of the whistle.

REDWOOD CITY—

Westward trains via Dumbarton line will stop to clear sign reading "End of Dumbarton Line," same located just east of the west wye switch. Conductor will then proceed to telegraph office and check register and obtain clearance and get advice of westward extras on Coast Division; then wait five minutes before fouling Coast main track, line switches from Coast siding to Coast westward main track and spur switch (located approximately 700 feet east of passenger station). With proper protection on the Coast Division main track, train may then proceed. This arrangement is necessary to avoid blocking street crossings. Eastward Western Division trains will stop west of the first street crossing west of the passenger station. Conductor will then proceed to the telegraph office and get authority from Coast Division train dispatcher to cross over, throw switches, wait five minutes and make cross-over movement under proper protection.

BAY SHORE—

When westward trains cross-over to enter Bay Shore yard at the east end, must stop at signal 71, sound four blasts of whistle (call for signals). On receiving hand proceed signal from herder, move into yard under control, speed not exceeding ten miles per hour. Switches must be thrown in the following order:

A. No. 4, switch at the yard end of cross-over.
B. No. 3, trailing point switch in eastward main track.
C. No. 1, switch in westward main track.
D. No. 2, facing point switch in eastward main track.

Before throwing any switches, it must be known that there is no train between signal 62 and the cross-over. Also, five minutes must have elapsed from the time switch No. 4 is thrown before switch No. 2 is thrown.

Westward trains leaving Bay Shore yard will throw switches in the following order:

E. Switch No. 5, trailing point switch in westward main track.
F. Switch No. 6, trailing point switch in eastward main track.
G. Switch No. 7, facing point switch in eastward main track.

Before throwing switch No. 7 it must be seen that no eastward train is approaching. Five minutes must have elapsed from the time of throwing No. 5 to the time of throwing No. 7. In addition, after switch No. 7 is thrown, five minutes more must elapse before fouling the main track. Full protection as per Rule 99 must also be given.

When engineers of eastward freight trains desire switch at Bay Shore lined for the main track, they will so notify the switch tender by giving one short and two long (o ——— ———) blasts of the steam whistle immediately after leaving Tunnel 4.

TUNNEL No. 1—

Westward passenger trains approach west portal of Tunnel No. 1 prepared to stop, and proceed only on proceed signal with green flag or light by switch tender located at the cross-over switches.

Following whistle signals will be used by engineers for the guidance of switch tender at west end of Tunnel No. 1:

Engineers on westward trains and engineers from train yard or tracks paralleling Seventh Street in yard, will sound one short and two long (o ——— ———) blasts of whistle for main track.

Engineers on westward trains will sound one long and one short (——— o) blasts of whistle for train yard, Mission Bay.

Engineers on westward trains will sound one short, one long, one short (o ——— o) blasts of the whistle for tracks paralleling Seventh Street main lines in yard.

Engineers on westward trains must whistle at overhead bridge at Twenty-third Street to notify switch tender at west portal of Tunnel No. 1; be sure about place as sound does not carry otherwise.

At Mayfield, crossing over from Los Gatos line to westward main track, trainmen throw switches as follows: First, house track, second No. 3, third No. 4, then No. 2, which is facing point switch in eastward main track.

Street crossings at San Mateo and Gilroy must not be blocked to exceed 5 minutes.

Street crossings must not be blocked nor cars left standing in the street at Watsonville.

Cars must not be left standing on the streets of Redwood City. This refers particularly to the long drill track on the right of the eastward main track.

Head-lights of all engines, marker lights of trains and lights in passenger cars occupied must be kept burning while passing through tunnels between San Francisco and South San Francisco, Cuesta and Goldtree and Wright and Santa Cruz.

Engines on trains of twenty cars or over must in all cases be cut off before taking water.

In such case, or when cut off to flag to telegraph station leaving balance of train on main track, as a precaution, in addition to flagman, place one torpedo on rail 600 feet from remaining portion of train.

E. B. and A. L. Stone Company will do switching at Lapis. S. P. Co. trains going on this spur must protect.

Engines can take an emergency supply of water from stand pipe opposite section house at Neponset.

Consolidation engines must not be turned on Spreckels Junction wye.

FOLLOWING IS LIST OF DISTRICT AND EMERGENCY SURGEONS ON THIS DIVISION.

LOCATION	NAMES	TITLES	DISTRICTS
San Francisco	Dr. F. K. Ainsworth	Chief Surgeon and Manager	Pacific System.
"	Dr. W. B. Coffey	Division Surgeon	San Francisco.
"	Dr. J. H. O'Connor	District Surgeon	"
